You don't have to have everything figured out.

I am here to help you, gently and at your own pace, to create a farewell that truly honours the person you have lost.

Hello, I'm Judi

I have been a celebrant for over eight years. I bring the same care, attention and genuine warmth to every ceremony I create.

Conducting a funeral service is an absolute honour and privilege to say farewell to your loved ones. My role is not just to write and deliver a ceremony, it is to listen, make you feel at ease, and to help you feel a little less alone in the process.

I will take as much or as little time as you need. I will ask gentle questions and listen carefully to everything you share. And from that, I will create a personal ceremony that feels like a true and fitting tribute.

“People say I have the ability to listen, understand and capture exactly what is needed. I am guided always by empathy, love and a genuine desire to honour each person’s story.”

Ceremonies

Funerals

A funeral ceremony is one of the most personal and significant things a family will ever arrange.

I will work with you to create something that reflects who your loved one truly was, their personality, passions, humour, and life story.

The ceremony will be written entirely from what you share with me, shaped into something that offers both comfort and celebration.

Held a Crematorium or Cemetery

Memorial Services

A memorial service may take place days, weeks or even months after losing your loved one, perhaps when more people are able to gather, or when the family is ready. I will help you plan something that feels right for the moment, wherever and whenever that may be.

These services are often chosen when a funeral could not take place, or your loved one has chosen a direct cremation and you still want to celebrate their life

Memorial services can be held virtually anywhere

What Your Ceremony Could Include

- A warm welcome that sets the tone and helps guests feel held

- Music that was meaningful or they may have already expressed their choices
